

PROTOS ENERGY RECOVERY FACILITY – CONSTRUCTION UPDATE

June 2021

Dear Resident,

I am writing to provide you with some information about the ongoing construction of the Protos Energy Recovery Facility at the Protos energy and resource hub.

The facility, which will generate electricity by processing residual waste that cannot be economically recycled, is being built by a joint venture between Mytilineos S.A. and Standardkessel Baumgarte GmbH. Both companies are internationally recognised for their expertise in the energy sector.

Construction work started towards the end of 2020 and we have recently started piling work to lay deep foundations into the ground. Unfortunately, piling is typically noisier than other construction activities and, depending on weather conditions, you may be able to hear it during the day.

In order to complete this work as quickly as possible whilst also complying with our planning conditions, piling works will only take place from 7.30am to 6pm, Monday to Friday and 8am to 1.30pm on Saturdays. At the moment,

PTO

we anticipate that piling work will finish in November of this year but we will do everything we can to minimise disturbance as much as possible. Subject to agreement with the local authority, other less noisy works may be undertaken outside the above times.

We are monitoring noise levels at various locations in the neighbourhood to ensure that we continue to stay below the levels stipulated in the planning permission for the project. We will continue to do this and wherever possible make use of quieter piling techniques and available noise reduction measures.

We sincerely apologise for any disturbance the piling works may cause. This work is unfortunately a necessary and unavoidable stage of the construction process and we hope you will bear with us. If you need to contact us at any time, please email info@protoserf.com or call 01244 940852.

For the latest information on the project, please visit our website, www.protoserf.com.

Yours faithfully,

Stig Christensen
Resident Project Manager
